## Summary

I am an aspiring UI/UX designer passionate about creating intuitive and engaging digital experiences. I enjoy exploring design tools like Figma and Canva, and I'm building a foundation in frontend development (HTML, CSS, Tailwind) to bring designs to life.

Alongside UI/UX, I have designed various posters and digital creatives for events and programs, which has strengthened my skills in visual storytelling, layout, and branding.

Through projects like Jobify – a job portal web app and RoboRider – an award-winning IoT project, I've gained hands-on experience in problem-solving, teamwork, and creativity. My design approach focuses on simplicity, usability, and storytelling, ensuring that every project connects with people while achieving its purpose.

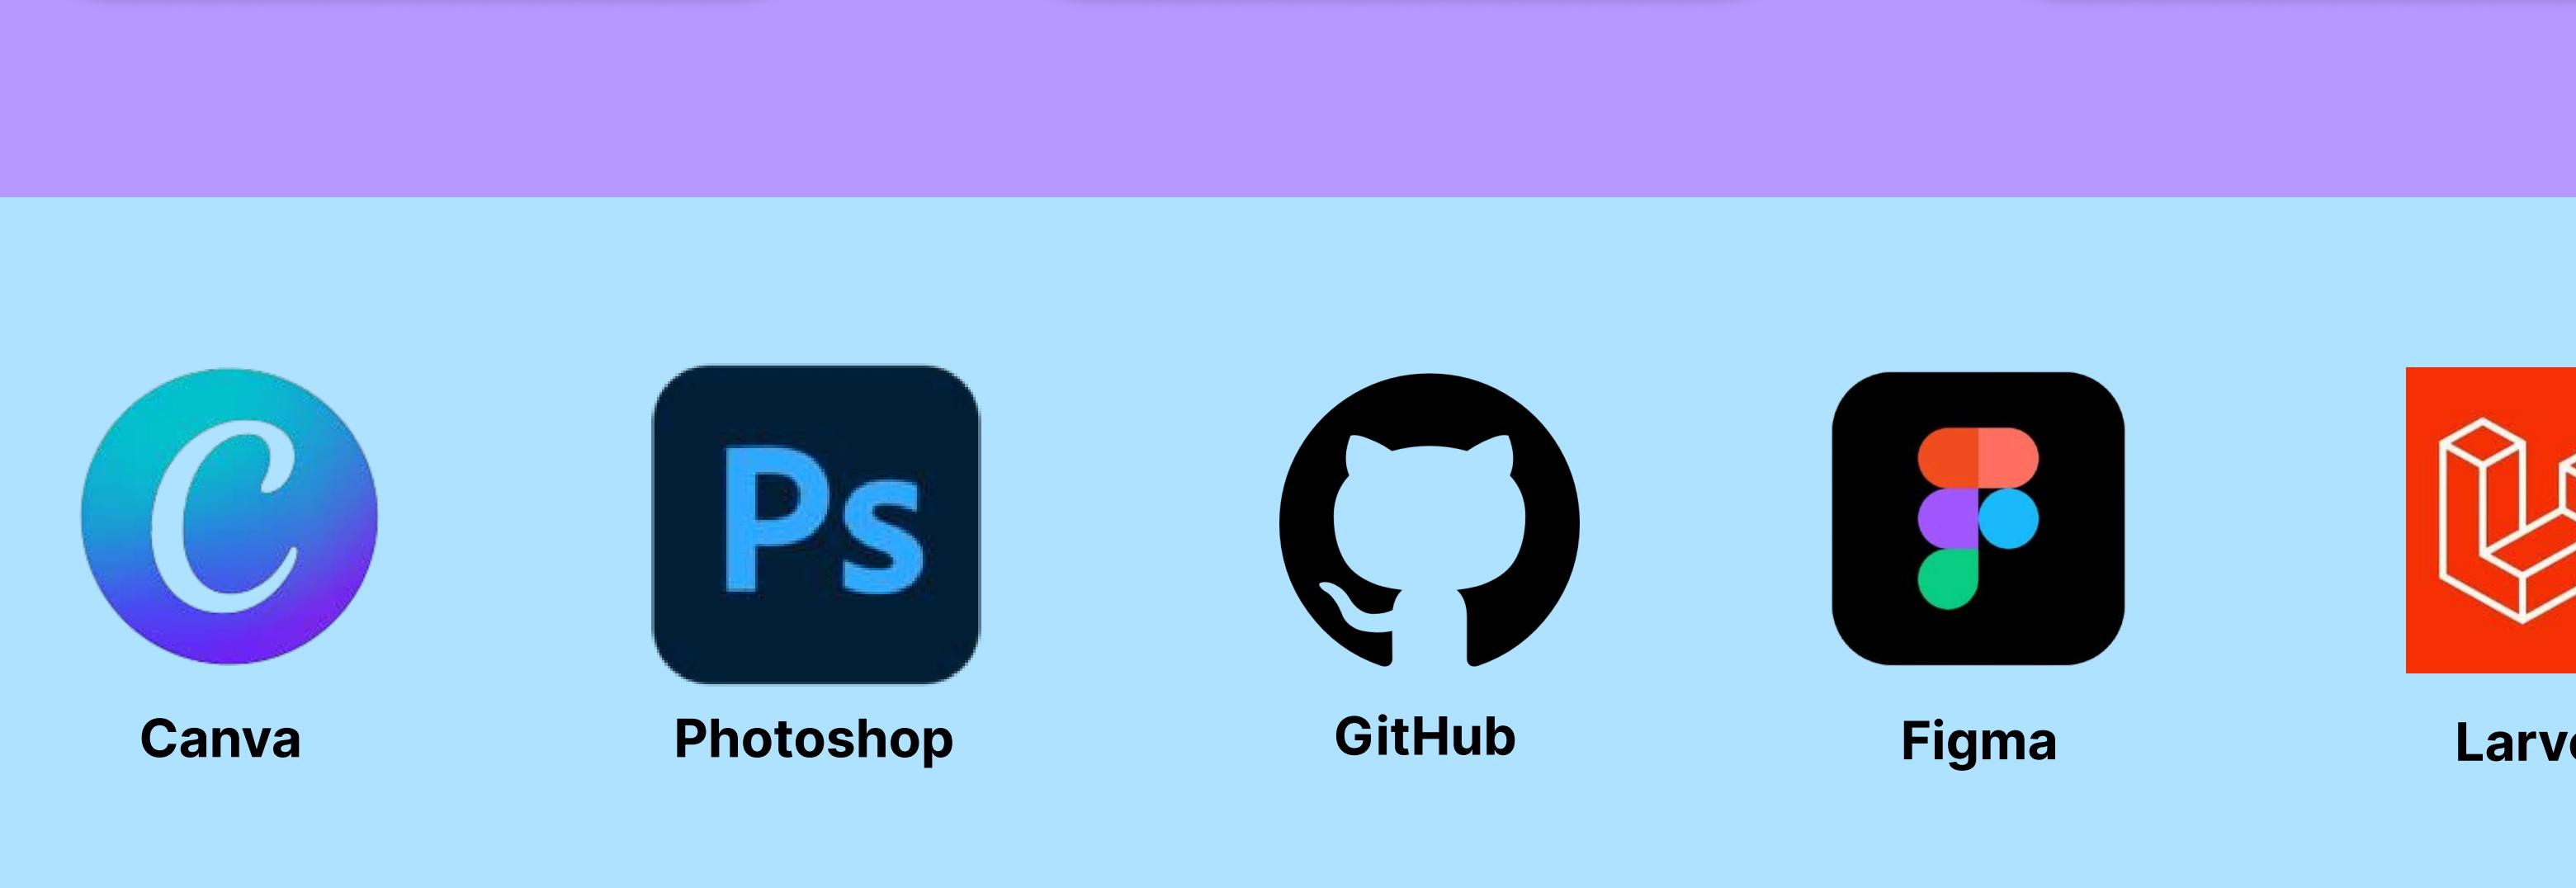

**Driven by curiosity and a desire to learn, I'm continuously improving my skills in wireframing, prototyping, and visual design, aiming to craft designs that make a real difference for users.**

## Projects

### Freelance / College Design Projects (2023–2025)

- Designed posters, banners, and digital creatives for college fests, events, and awareness programs.
- Enhanced skills in layout, typography, and branding, using tools like Canva and Figma.
- Recognized for creative contributions in promoting events and building engagement.

Here are some of my recent works showcasing my design

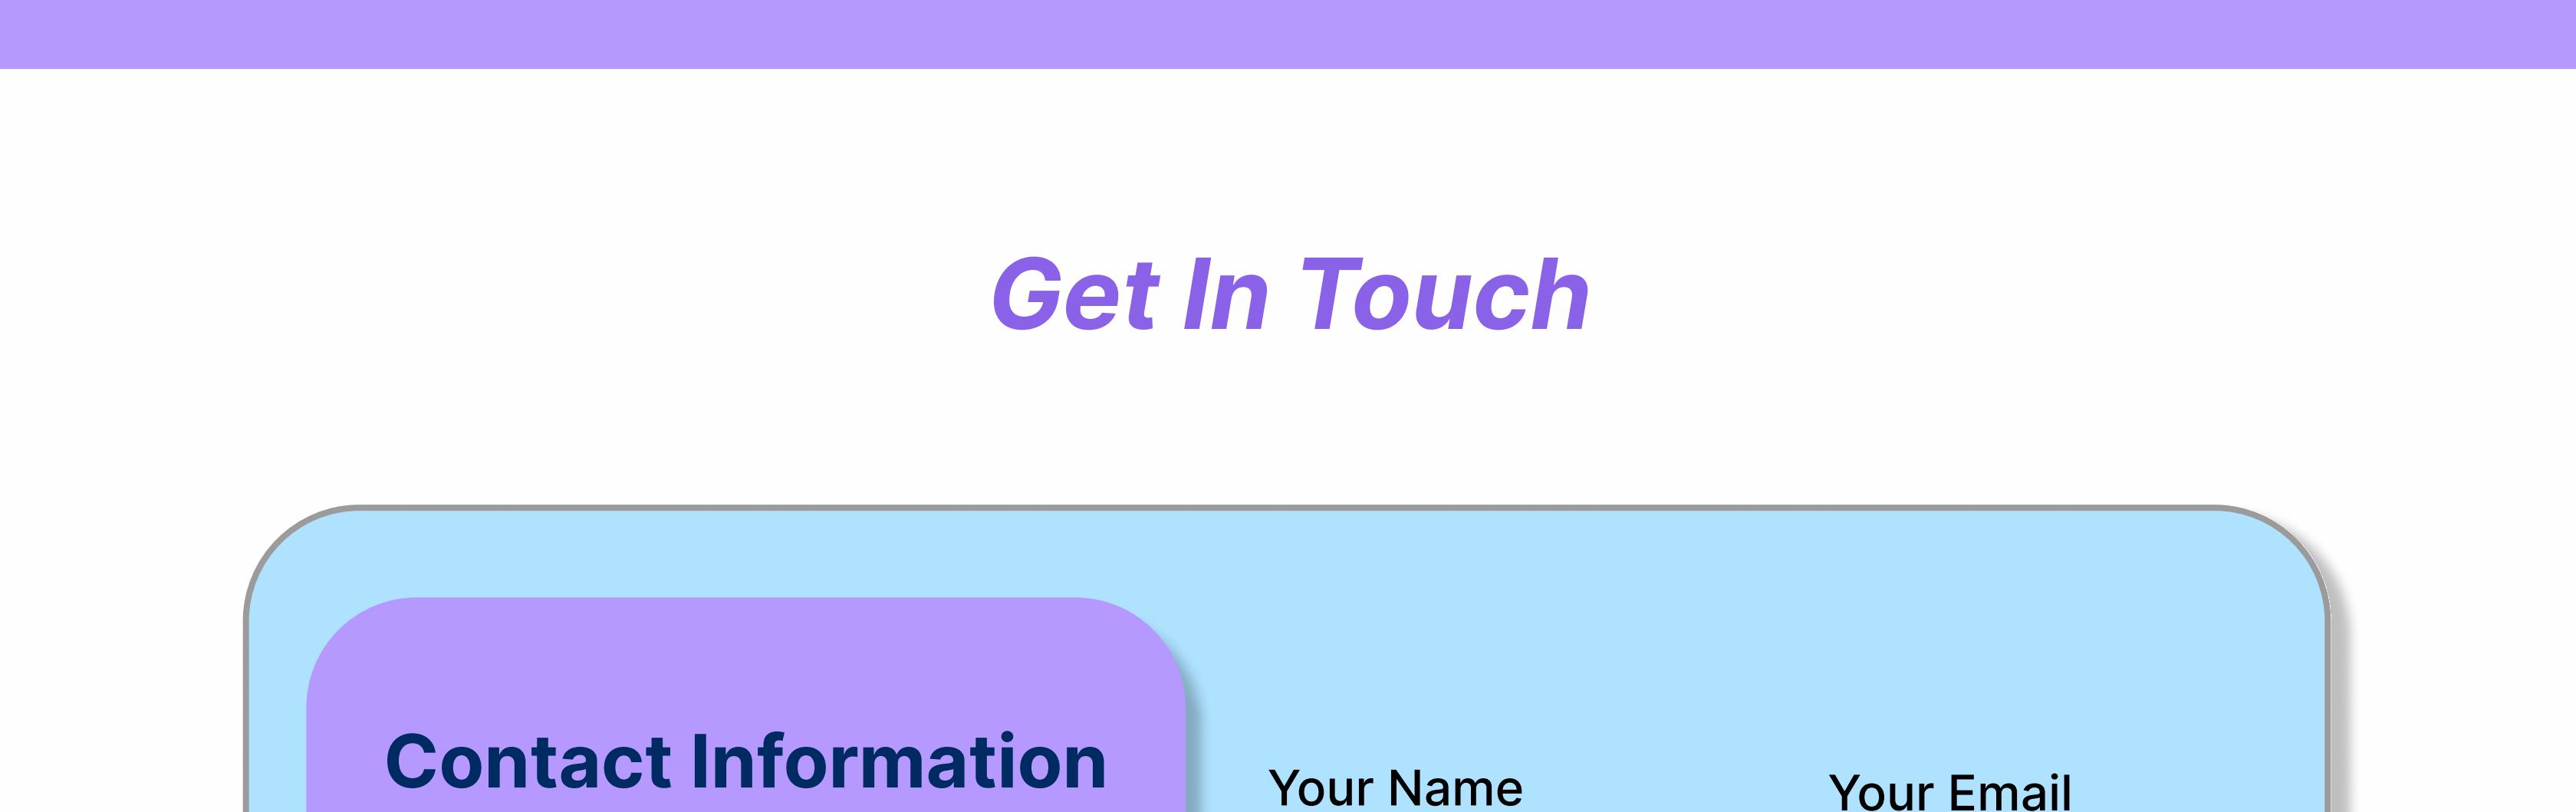

### Jobify – Job Portal Website

- Description: A web-based job portal management system that helps users find jobs and internships, designed with a modern UI and responsive layout.
- Technologies: PHP, Laravel 11, MySQL, Tailwind CSS, Figma

### RoboRider – IoT Project (First Place Winner)

- Description: An innovative IoT-based project that combined robotics and automation to solve real-world problems, winning 1st place in the college competition.
- Technologies: IoT, Robotics, Sensors

## Education

### Master in Computer Application (2025-27)

St Aloysius (AIMIT)

### Bachelor in Computer Application (2022-25)

Milagres College Kallianpur
